

Select time series:  
real climate data

### A. Indicator trend analysis

- interpolate data? ☐
- log-transform data? ☐
- choose filtering method:  
gaussian
- rolling window size (in %)  
50
- bandwidth

### Generic Early-Warnings: Autocorrelation – Variance

### B. Trend sensitivity analysis:

- choose rolling window size increment  
50
- bandwidth increment  
20

### C. Potential analysis

cutoff level 0.05
