

Example 2: climate data - end of Younger Dryas

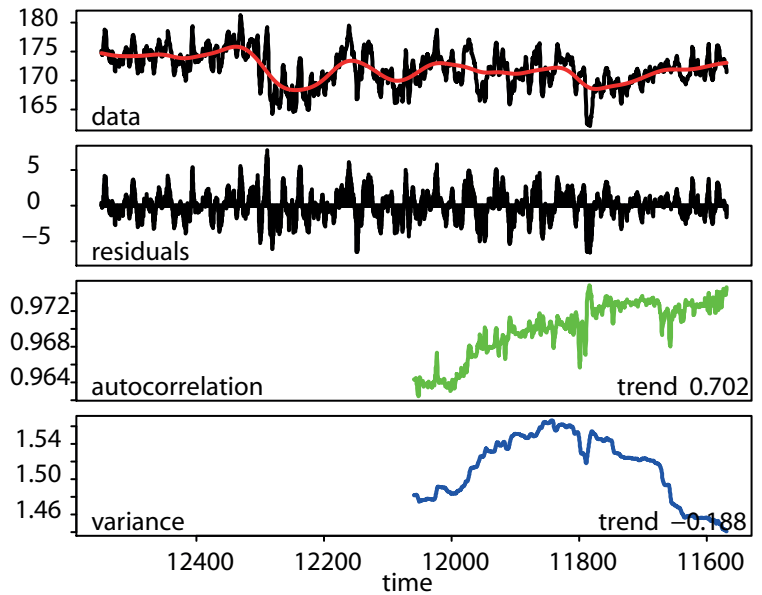

A. Indicator trend analysis

- interpolate data? No
- log-transform data? No
- choose filtering method: gaussian
- rolling window size (in %) 50

A

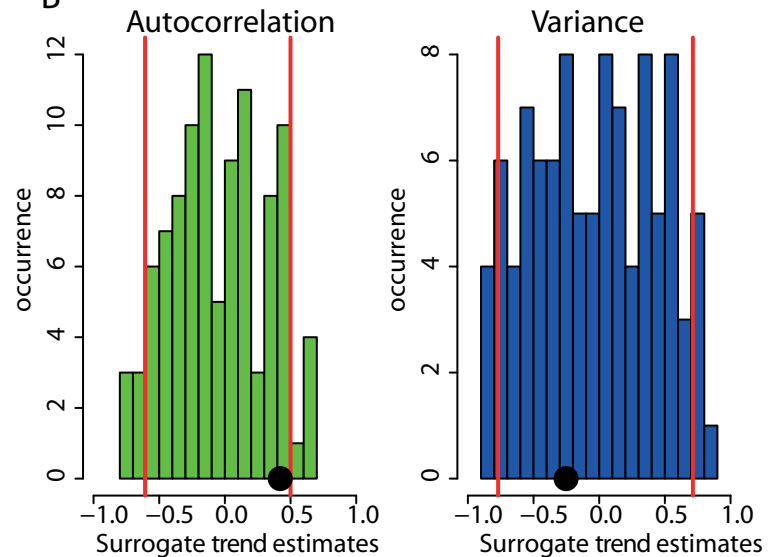

Generic Early-Warnings: Autocorrelation – Variance

B. Trend significance analysis:

- choose number of surrogate sets 100
- choose level of significance 0.05

B

C. Potential analysis

- cutoff level 0.5

C
